CHITTINEDI DINESH

Andhra Pradesh, India | +91 7780648383 | dinesh435ch@gmail.com | linkedin.com/in/dinesh-ch-7907052b5 | github.com/dinesh-ch3 | dinesh-ch3.github.io/portfolio-site

PROFESSIONAL SUMMARY

High-velocity **Data Analyst** with proven expertise across the full analytics lifecycle — from architecting complex SQL queries and automated Python validation pipelines to engineering executive Power BI dashboards and calibrated risk models. Analyzed 10,000+ clinical and financial records, optimizing healthcare capacity planning and building credit delinquency forecasting systems (ROC-AUC: 0.854) that mitigate multi-million dollar portfolio exposure. Adept at transforming messy, multi-source transactional data into intuitive business intelligence that accelerates executive decision-making.

TECHNICAL SKILLS

Databases & Query Languages:	SQL (PostgreSQL, MySQL, SQL Server — CTEs, Window Functions, Multi-table JOINs, Subqueries, Optimization), Relational Schema Design
Business Intelligence & Dashboards:	Power BI (DAX Measures, Star Schema Data Modeling, Power Query ETL, KPI Dashboards), Advanced Excel (XLOOKUP, Dynamic Arrays, Nested INDEX/MATCH, Pivot Tables)
Programming & Data Science:	Python (Pandas, NumPy, Scikit-Learn, Seaborn, Matplotlib, Streamlit), Exploratory Data Analysis (EDA), Data Cleaning & Imputation, Feature Engineering, Cohort Analysis
Methodologies & Tools:	Git, GitHub, SQLite, REST APIs, Jupyter Notebook, VS Code, Explainable AI (XAI)

PROFESSIONAL EXPERIENCE

InAmigos Foundation — *Remote* **Oct 2026 – Present**
AI Data Analytics Intern

- Architected scalable Python (Pandas/NumPy) and SQL data validation workflows to ingest, clean, and validate 5,000+ multi-source organizational records, reducing pipeline data anomalies by 40%.
- Engineered automated KPI tracking models and visual dashboards to evaluate organizational performance trends, volunteer retention, and operational resource allocation drivers.
- Synthesized raw multi-table findings into actionable stakeholder summaries and visual briefing decks, directly informing leadership operational decisions.

FLAGSHIP TECHNICAL PROJECTS

Geldium AI: Delinquency Risk Forecasting & Collections Engine **Python, Scikit-Learn, SQLite, Streamlit**
GitHub: github.com/dinesh-ch3/ai-credit-risk-engine **2026**

- Engineered an end-to-end retail credit risk scoring pipeline across $14M+ portfolio exposure in Python and SQLite, training calibrated classification models (ROC-AUC: 0.854) achieving 89.5% default recall at an optimized 0.30 decision cutoff.
- Integrated Explainable AI (XAI) feature attribution isolating top-3 adverse credit factors to ensure regulatory compliance under ECOA and FCRA frameworks.
- Developed an interactive Streamlit analytics console featuring borrower stress-testing, custom SQL querying, and automated GenAI workout memo generation for pre-emptive debt restructuring.

Hospital Patient Admissions & Operational Performance Dashboard **SQL, Power BI, DAX, Git**
GitHub: github.com/dinesh-ch3/hospital-data-mining **2026**

- Ingested, cleaned, and normalized 10,000+ patient records using advanced SQL (CTEs, Window Functions, and multi-table JOINs), resolving structural schema anomalies and duplicate encounters.
- Engineered an interactive Power BI dashboard tracking clinical KPIs (Average Length of Stay [ALOS], bed occupancy rates, and admission spikes) using star-schema modeling and 15+ custom DAX measures.
- Identified department-level operational bottlenecks to optimize hospital bed utilization and capacity planning, cutting reporting latency for executive staff.

Smartphone Pricing & Specification Market Intelligence **Python, Pandas, Seaborn, EDA**
GitHub: github.com/dinesh-ch3/smartphone-market-analysis **2026**

- Standardized 1,500+ device specification records across multiple brands using Pandas and NumPy, handling missing attributes, categorical encoding, and currency normalization.
- Conducted multivariate correlation and regression analysis with Seaborn/Matplotlib, discovering that RAM capacity and battery tiers drive ~72% of mid-range retail pricing.
- Delivered interactive distribution charts and segment heatmaps isolating competitive pricing tiers to inform brand product positioning.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science — *BV Raju College (Adikavi Nannaya University)* **Aug 2021 – Nov 2024**
Completed Full-Time Undergraduate Degree in Computer Science

Master of Computer Applications (MCA) — *KGRL College, Bhimavaram* **Aug 2026 – Present (Flexible)**
Flexible Academic Schedule • 100% Available for Immediate Full-Time Employment (40 hrs/week)

CERTIFICATIONS

- **GenAI Powered Data Analytics Simulation** — Tata & Forage (Credit Risk Profiling & Collections Strategy)
- **Data Analyst Professional Certification** — Udemy (Hands-on SQL, Power BI, Advanced Excel, Python)
- **AI Data Analytics Specialization** — InAmigos Foundation (Performance Certified in Multi-source Data Modeling)
