PROFESSIONAL SUMMARY

Analytical and results-oriented Data Analyst skilled in SQL, Python (Pandas, NumPy), Power BI, and Advanced Excel. Experienced in exploratory data analysis (EDA), multi-source data extraction, and developing interactive dashboards that translate complex operational data into actionable business intelligence. Proven track record of analyzing 10,000+ patient and consumer records to optimize operational efficiency and identify key growth drivers.

TECHNICAL SKILLS

Programming & Query Languages: SQL (MySQL, SQL Server), Python (Pandas, NumPy, Seaborn, Matplotlib)
Business Intelligence & Analytics: Power BI (DAX, Data Modeling, Power Query), Advanced Microsoft Excel (Pivot Tables, XLOOKUP, Charts)
Core Concepts: Exploratory Data Analysis (EDA), Data Cleaning, Feature Engineering, Statistical Analysis, KPI Dashboards
Developer Tools: Git, GitHub, Jupyter Notebook, VS Code

WORK EXPERIENCE

AI Data Analytics Intern **Oct 2026 – Oct 2026**
InAmigos Foundation | Remote

- Conducted exploratory data analysis (EDA) and analytical data validation on multi-source datasets using Python (Pandas, NumPy) and SQL.
- Developed structured KPI reporting models and visual dashboards to evaluate organizational performance trends and operational drivers.
- Synthesized raw analytical findings into actionable stakeholder summaries, earning an official performance certification (Reg No: U85300CT2020NPL010641).

TECHNICAL PROJECTS

Hospital Patient Admissions & Operational Performance Dashboard **SQL, Power BI, Git**
GitHub: github.com/dinesh-ch3/hospital-data-mining

- Ingested, cleaned, and normalized 10,000+ patient records using advanced SQL (CTEs, Window Functions, and multi-table JOINs), resolving structural anomalies.
- Engineered an interactive Power BI dashboard tracking healthcare KPIs (ALOS, department-wise bed occupancy, admission spikes) to optimize capacity planning.

Smartphone Pricing & Specification Market Analysis **Python, Pandas, Seaborn**
GitHub: github.com/dinesh-ch3/smartphone-market-analysis

- Standardized 1,500+ device specification records across multiple brands using Pandas and NumPy, handling missing attributes and price normalization.
- Conducted multivariate correlation analysis with Seaborn/Matplotlib, identifying RAM and battery tiers as primary mid-range price drivers.

Health Insurance Billing & Risk Factor Analysis **Excel, Pivot Tables, Statistical Modeling**
GitHub: github.com/dinesh-ch3/insurance-cost-analysis

- Cleaned and validated 1,300+ insurance billing records in Excel, resolving data anomalies using conditional formatting and validation rules.
- Constructed dynamic Pivot Tables and nested formulas (INDEX/MATCH, XLOOKUP), uncovering that smokers accrued ~280% higher claims on average.

EDUCATION

Master of Computer Applications (MCA) **Aug 2026 – Present (Expected 2028)**
KGRL College, Bhimavaram | Flexible Schedule • Eligible for Immediate Full-Time Employment (40 hrs/week)

Bachelor of Science (B.Sc.) in Computer Science **Aug 2021 – Nov 2024**
BV Raju College, Bhimavaram (Adikavi Nannaya University)

Intermediate (+2 MPC) **Jun 2019 – Mar 2021**
Narayana Junior College, Bhimavaram | Percentage: 74.4%

CERTIFICATIONS

- **GenAI Powered Data Analytics Job Simulation** — Tata & Forage (Risk Profiling, Delinquency Modeling & Collections Strategy | Oct 2026)
- **AI Data Analytics Internship Certificate** — InAmigos Foundation (Reg: U85300CT2020NPL010641 | CSR: CSR00083159)
- **Data Analyst Certification** — Udemy (Hands-on training in SQL, Power BI, Excel, Pandas, NumPy, Seaborn, and Machine Learning)
